All,

Attached please find the preliminary community air monitoring summary for CTEH air monitoring activities from December 8, 2019 0:600 through December 9, 2019 0:600 CST.

Some bulleted notes below:

- Since the beginning of the response, over 60,000 real-time air monitoring readings have been taken throughout the community.
- Since the beginning of the response, there have been 19,102 readings of 1,3-butadiene recorded within the community with 561 detections above the instruments detection limit; the highest detection of 12.09 ppm occurred the night of the voluntary evacuation (12/4).
- Since the beginning of the response a total of 238 detections of 1,3-butadiene recorded within the community exceeded the UC-approved action level of 0.5 ppm.
- Since 14:30 CST on 12/6/2019, there have been no exceedances of the UC-approved action level of 0.5 ppm 1,3-butadiene.
- Since the beginning of the response, there have been 19,581 readings of VOCs recorded within the community with 488 detections above the instruments detection limit; the highest detection of 12.9 ppm occurred the night of the voluntary evacuation (12/4).
- Since the beginning of the response a total of 12 detections of VOCs recorded within the community exceeded the UC-approved action level of 5.0 ppm.
- Since 06:00 CST on 12/5/2019, there have been no exceedances of the UC-approved action level of 5.0 ppm VOCs

Regards,

Shawn
